Established in 1989 and based in Ireland, Image are one of Europe's leading manufacturers of shower enclosures that appeal to both traditional and contemporary living whilst encompassing innovative designs that are synonymous with style, affordability, durability and absolute quality.

At Image our engineers, designers and craftsmen focus on manufacturing products that utilise the finest highly polished chrome aluminium, coupled with 6mm, 8mm or 10mm toughened safety glass.

We are proud to have been awarded ISO9001 quality assurance certification. All of our shower enclosures and screens are constructed to the rigorous EN12150 Class A standard.

You can be assured that every detail is designed with performance, reliability and solidity, which is why we are confident enough to offer a lifetime guarantee across our entire range.

Image iShield acts as a protective coating which when applied helps prevent the build up of limescale and soap deposits whilst also ensuring droplets roll away from the surface making the shower glass 'easy to clean'.

Image manufactures a range of shower enclosures, trays and screens designed to meet the requirements of contemporary or traditional living. Our innovative designers have produced a comprehensive selection to meet your needs, including recess, corner, single wall and many other bespoke styles.

All of our enclosures are constructed from highly polished chrome aluminium, include iSHIELD safety glass, enjoy the benefits of the easy clean iROLLER system, together with signature heavy weight metallic furniture, door fixtures and fittings. They are reversible for ease of installation, suitable for use with power showers and wetrooms whilst having 'silent cushioned closing' that represents absolute quality.

**THE ARCHITECT AND DESIGNERS CHOICE,

1 INLINE HINGE

COLOURED GLASS

Our toughened safety coloured glass offers a unique and modern alternative to tile designs and is quickly becoming a much innovative way of decorating your Bathroom or Kitchen.

The Installation process is quick, clean and quiet. We provide a measuring service which ensures that the correct size of glass is ordered, and fitted in place.

General maintenance of the glass compared to tiles which has many grooves and notches, is relatively less challenging and will fit into your demanding schedule.

The fact that the glass is laminated means your imagination has wider spectrum when choosing a colour. We offer a wide range of classic RAL colours

that can be used in your Bathroom, Shower, or Kitchen regardless of size. We can make "cut outs" to fit neatly your Sockets, Switches, Shower Valves

The glass provides both a decorative and functional aspect to your room and its reflective surface can enhance the overall appearance of the interior. It is suitable for both domestic and commercial applications.

The above RAL Colours are our most popular colours and are displayed as a guide only. Other RAL Colours can be supplied as a special if required.

End result may vary depending on glass type used. Clear glass has a slight green tint to it due to iron content. A low-iron glass will give a truer match.

SHOWER TRAYS

Low Profile 40mm complete with 90mm waste

Our Low Profile Shower Tray design lends itself to the latest bathroom trends and achieves all the benefits of solid cast stone trays.

Our simple stylish trays deliver high quality looks and functionality, whilst perfectly complementing Image enclosures.

Our low profile designs are available in Quadrant, Offset Quadrant, Rectangular and Square size options.

RECTANGULAR

TECHNICAL INFORMATION

PRODUCT

All products are manufactured in accordance with ISO 9001 and EN 14428 and utilise toughened safety glass to EN 12150-1 class A standard.

Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464.

Water retention is maintained in all products under normal showering conditions.

Doors and enclosures have been tested in accordance with EN 14428 and are suitable for use with most modern power showers.

All products are supplied complete with full installation instructions and the necessary fixings.

Colour reproduction is limited by the lithographic printing process. Check with your retailer for accurate matching of material samples. Product descriptions do not imply the use of precious or valuable materials.

Trays shown in this brochure are for illustrative purposes only.

Our policy of reviewing product design and development on a regular basis means Image reserve the right to change product specifications and prices without notice.

All doors feature adjustable wall profiles to compensate for out-of-true walls and have micro adjustment features for fine tuning to obtain a perfect fit and operating action. Glass shattering and parts subject to wear are not covered by the lifetime guarantee.

The position of all shower valves in the brochure is for illustrative purposes only.

SHOWER TRAYS

Although Image shower door and enclosure sizes are related to tray sizes it is important to note that most trays are tiled down to the rim, often over an 'up-stand'.

The finished installation space may be less than the nominal tray size. Image shower units are made to suit this remaining space.

Tray finish Min-Max

These are the minimum and maximum dimensions that a shower door or enclosure will fit using standard wall profiles.

Tray finish

To find the correct Tray Finish dimension:
In a recess: Measure from the finished, tiled wall to the opposite finished, tiled wall. In a corner: Measure from the finished, tiled wall to the edge of the tray.

CLEANING

It is important to clean your Image shower door after every use. Wipe down all the glass and metal parts with a soft cloth. Install the enclosure in a well ventilated area. Ensure that any residual water on the glass is removed after every use. Clean the glass regularly using soapy water. Do not allow lime scale to build up in hard water areas.

Do not use abrasive products on any surfaces.

BATHSCREENS

Bathscreens fitted on baths with a raised head or shape is not recommended. Screens are not designed to fit baths with roll top rims, integral soap dishes or stepped fronts. Take care not to obstruct screens with bath handles.

CE & EN INFORMATION

The CE marking on Image products is a declaration that the unit complies with the essential requirements of the relevant European health, safety and environmental protection legislation.

The CE marking on Image products indicates to government officials that the product may be legally placed on the market in their country. This ensures the free movement of the product within EFTA and European Union single market and permits the withdrawal of the non conforming products by customs and enforcement authorities.

Often consumers will consider CE marking on a product as an indication of conformance to laid down minimum standards and therefore, a minimum level of safety which other products may lack. CE marking is for many consumers a "Symbol of Safety."
