THE ESSENCE OF VITRA

A HISTORY OF INNOVATION

VitrA's rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products at his pharmacy in İzmir. Thirty years on, his son Dr Nejat Eczacıbaşı continued the family's flair for innovation by establishing a pharmaceutical laboratory in İstanbul. This business grew rapidly and in 1952 he opened the first Turkish modern pharmaceutical plant. Within the decade Eczacıbaşı's vision had grown to encompass ceramic sanitaryware and in 1958 he created the first centre for its production in Turkey. VitrA was born.

EXPERIMENTING WITH THE ELEMENTS

VitrA's innovation centre is the creative hub for the design and production of new materials, processes and technologies for our bathroom products and tiles. Here, architects and designers are encouraged to free their imaginations and original ideas are showcased in a setting that blends design with culture, art and lifestyle.

This approach results in innovative solutions that transform an ordinary bathroom into an exceptional living space – new ideas that improve comfort and ergonomcy, and ensure sustainability.

VITRA IS AN INTERNATIONAL BRAND, PRODUCING 5 MILLION PIECES OF SANITARYWARE PER YEAR AND EXPORTING TO 75 COUNTRIES WORLDWIDE

INTERNATIONAL RECOGNITION

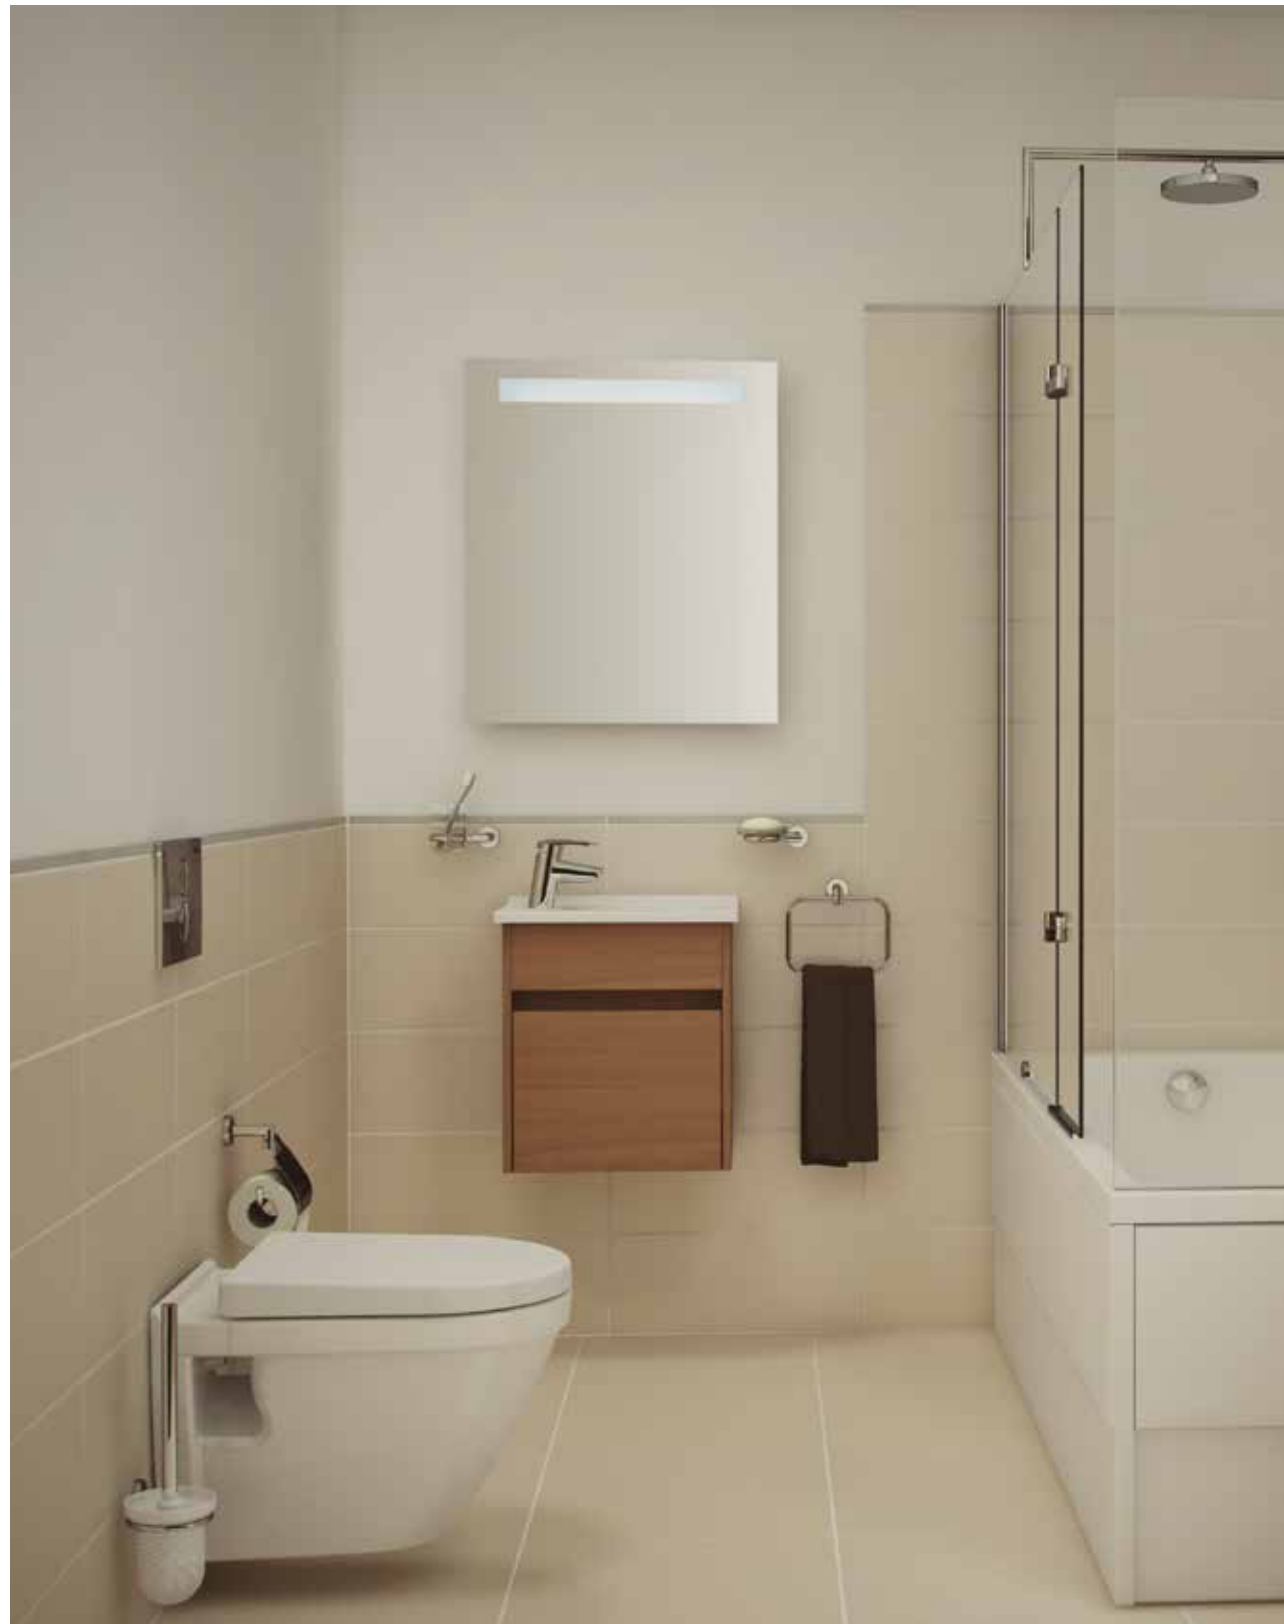

VitrA's successful relationships with international designers have led to the company winning many accolades for its products. Among these are the Wallpaper Design Award, Elle Deco Award, Good Design Award and Red Dot Design Award. VitrA has also received three iF product design awards for excellence in product and design quality.

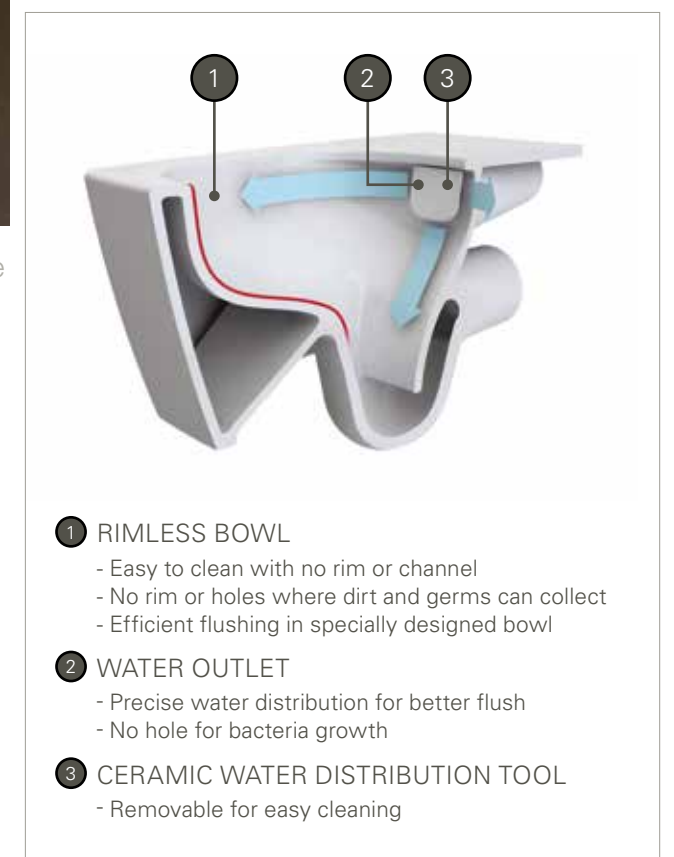

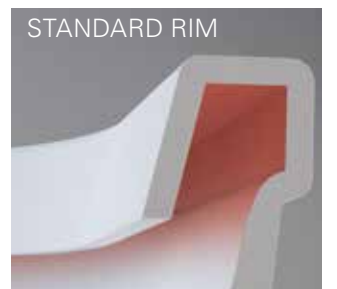

This would never have been possible without the strong relationships VitrA upholds with its designers. One key example being NOA (left), a German design studio that has collaborated with VitrA to produce the highly popular S50 and S20 collections.

VITRA RIM-EX

VITRA RIM-EX: EFFORTLESS
CLEANING AND INNOVATIVE,
HYGIENIC DESIGN

Vitra's rimless WC pan eliminates the places where germs gather and multiply, giving you a superior level of hygiene. The unique water distribution engineering at the back of the pan directs the flush around the bowl and can also easily be removed for cleaning.

- Easy cleaning
- No rim or holes for germs to collect
- 95% more hygienic than standard WC pans*

* Tests undertaken by the Akdeniz University, Turkey show Vitra RIM-EX WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

BLUE LIFE

A PLEDGE TO THE FUTURE

Blue Life is the production approach, design, attitude and management outlook of all Eczacıbaşı Building Products Division brands including VitrA.

Blue Life
For our blue planet...

- Blue Life means reducing the use of non-renewable resources in the production process.
- Blue Life means making significant investments towards boosting eco-efficiency.
- Blue Life means developing products that promote power and resource conservation at the end-user level driven by a concern for the environment and for our collective future.
- We believe managing the future requires efficient management of our resources today; good design also means taking responsibility for resource conservation.

Product Certificates

Production Certificates

ISO 9001 Quality Certification
ISO 14001 Environmental Certificate
ISO 50001 Energy Management System Certificate
OHSAS 18001 Occupational Health and Safety Management System Certificate

BATHROOM SUITES

VitrA’s designers consistently create innovative bathroom suites and products that are not only practical and reliable but are a pleasure to experience. Designed with durability and space considerations in mind, the high quality materials and fixtures ensure each suite’s longevity.

OUR INNOVATIVE PRODUCTS ARE
INSPIRED BY THE PRINCIPLES OF
THE TURKISH BATHROOM CULTURE
BRINGING DESIGN, PRACTICALITY,
CHOICE AND QUALITY TO THE UK
BATHROOM MARKET TO MEET THE
STANDARDS AND DEMANDS OF
MODERN LIVING

BATHS

The culture of bathing has always been synonymous with health, wellbeing and relaxation. Today, Vitra's beautiful range of baths continues to invoke and enhance these associations. Straight or offset, shower baths or space saving options, sweeping lines and calming curves; whatever your preference, our products make bathing a sensory pleasure.

Vitra baths are made from high-grade acrylic with a superb finish. Each bath features a minimum of 5 adjustable feet, a fully encapsulated wooden baseboard and frame, and an advanced wall fixing kit keeping the bath tightly in place and ensuring stability with no creaking or bowing. All baths carry a 25-year guarantee and panels a 2-year guarantee.

ALL VITRA BATHS HAVE FULLY ENCAPSULATED BASE BOARDS AND FRAMES TO GIVE THEM A QUALITY FINISH AND EASIER INSTALLATION

BRASSWARE

VitrA mixes graceful curves with elegant angles to create brassware that is both aesthetically and ergonomically pleasing. Carefully engineered design ensures flow and temperature control requires only the lightest of touches, and every consideration is given to conserving water and energy without compromising the user experience.

Designed and manufactured specifically for the UK market and to meet the requirements of varying UK water pressure, VitrA brassware is incredibly easy to install. The main body of each item is of brass construction, and this durability is underpinned by the reassurance of a 7-year guarantee on chrome plating and a 1-year guarantee on moving parts.

CONCEALED CISTERNS

Hidden behind the wall, Vitra’s frame systems are crucial to any modern bathroom, supporting and holding wall-hung WC’s firmly in position. Vitra’s frames give designers complete freedom to create a stunning room without expensive structural building work.

CONCEALED CISTERNS

INSTALL & SPECIFY WITH CONFIDENCE

PRACTICAL AND ESSENTIAL FEATURES
Cisterns, pipes, U-bends and other unsightly components become invisible with the use of a concealed cistern and frame. The benefits are not just aesthetic: here are some practical reasons for choosing a Vitra wall-hung WC and concealed solution.

HYGIENIC
Keeping a bathroom clean and hygienic is made easier with wall-hung sanitaryware. All unsightly pipe work, a haven for dirt and dust, is hidden behind the wall and the WC is lifted from the floor, providing a smoother and easier cleaning area.

SILENT
The special fill valve located inside the concealed cistern is silent filling. The cistern is covered with styrofoam to provide extra sound proofing.

SPACE-SAVING
A wall-hung WC solution takes up less room than a conventional WC and the concealed installation offers flexibility in confined spaces. A wall-hung WC will give the illusion of a larger bathroom as a greater floor area can be seen.

WATER SAVING
The dual flush action for both the 8cm and 12cm concealed cisterns operate at 2.5/4L or 3/6L, resulting in up to 70% less water consumption, benefiting both you and the environment.

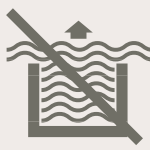

ACCESSIBLE MAINTENANCE
The control panel can easily be removed, providing ready access to internal fittings. Control panels have a 5-year guarantee.

PRACTICAL & QUICK INSTALLATION
Installation of the concealed frame is quick and easy because of its intuitive design, especially advantageous for multiple installations.

QUALITY & ASSURANCE

100% RELIABILITY AND PERFORMANCE
Vitra's concealed cisterns and frames are subjected to rigorous reliability and performance testing at Vitra's production facilities.

OVERFLOW TESTING
The overflow pipe located within the valve is the product's safety device. The pipe's performance is tested according to the standards of water flow.

STRENGTH AND STABILITY
Concealed frames and wall-hung WC pans have been designed to support weights of up to 400kg.

FLOW RATE TESTING
The amount of water used during flushing is pre-determined to meet industry standards. If the cistern is not flushed at the required flow rate, the WC pan may not be cleaned properly. As a result, the products must pass a quality control test according to the flow rate (2L/second) set by international standards.

LEAK DETECTION TESTING
We test each and every cistern individually to ensure that it is 100% watertight.

PERFORMANCE TEST
All products are subjected to rigorous performance testing at Vitra's production facilities. Products are tested to ensure that they operate flawlessly before they can be passed.

LONGEVITY TEST
Our products are periodically tested for longevity according to international standards. Not one of the product's components demonstrated a drop in performance after being consecutively tested 200,000 times.

SPECIFIC DESIGN FEATURES

1 INTERVAL TAP
An interval tap is supplied pre-installed to the cistern. If maintenance is required, isolating the water flow is easily accessed, allowing repairs to be carried out.

2 PANEL OPENING
The panel opening on the body of the cistern provides easy access to the components and has been designed with an optimum opening size to ensure that maintenance of the product can easily be carried out.

3 STYROFOAM COATING
The bottom section of the cistern is completely coated with styrofoam which prevents condensation and also provides improved sound insulation.

4 FLUSHING UNITS
The most important component of the cistern is the flushing unit responsible for ensuring the flow of water from the cistern into the WC pan. This component meets very stringent standards, to ensure that it does not leak.

5 CONTROL PANEL
The control panel is the component that operates the cistern. The panel can easily be removed for maintenance purposes.

6 FILL VALVE
One of the most important components, the fill valve controls the water being fed into the cistern. To ensure safety and guaranteed performance, these units are subjected to longevity testing. The units are also equipped with filters that eliminate the risk of clogging to ensure durability and long term use.

7 OVERFLOW PIPE
The overflow pipe located within the flushing component maintains the safety of the concealed cistern. If the cistern fills with excessive water, the pipe ensures that the surplus water is diverted into the WC pan to avoid overflowing.

8 METAL LEGS
Metal legs ensure that the height and calibration of the product from the floor can be completed accurately at the time of installation.
