RIM-EX TECHNOLOGY

THE ESSENCE OF VITRA

VitrA products are designed to give you a bathroom where you can relax and combine practical usage and storage with comfort, beauty and easy maintenance.

VITRA HAS RECEIVED TWO 2014 iF PRODUCT DESIGN AWARDS FOR EXCELLENCE IN PRODUCT AND DESIGN QUALITY

PHILOSOPHY: IT'S ALL ABOUT INSPIRATION

VitrA's quest is to create complete, relaxing bathroom environments. This means transforming often overlooked spaces into something more than a necessity of modern life. It's about creating an enjoyable experience by changing our perception of the bathroom.

THE ESSENCE OF VITRA

DESIGN EXCELLENCE RECOGNISED

The superior design, quality and innovative features of VitrA products have been acknowledged with some of the world's most prestigious awards.

THE ESSENCE OF VITRA

INSPIRED APPROACH TO DESIGN

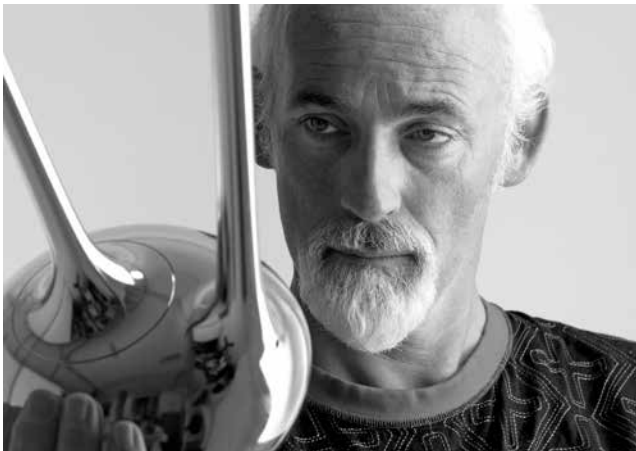

VitrA employs its own large in-house design team but also collaborates closely with a world-class collection of independent, acclaimed designers. These talented individuals apply their creative flair and instinct to bathroom design, to not only improve bathroom aesthetics, but functionality as well.

OUR AWARD WINNING DESIGN STEMS FROM A CREATIVE AND COLLABORATIVE APPROACH

INTERNATIONAL RECOGNITION

The strong relationships we have with designers around the world have enabled us to push the creative boundaries of bathroom design. One key example of this is our work with NOA, a German design studio that has collaborated with VitrA to produce the highly popular T4, Shift and M-Line collections.

This global pool of exceptional design talent has resulted in VitrA being awarded many accolades. Among them are the Wallpaper Design Award for Best Bathroom, an Elle Decor Award, Good Design Award and Red Dot Design Award. This year VitrA received two 2014 iF product design awards for excellence in product and design quality.

ROSS LOVEGROVE

One of the most fascinating designers of the 21st century and recipient of countless awards, Ross Lovegrove creates sculptural and organic shapes using sophisticated technology and materials. His design concept ‘organic essentialism’ is inspired by elements from the natural world which are then reshaped into futuristic forms.

CHRISTOPHE PILLET

Based in France, Christophe Pillet’s name is synonymous with stylish, functional and natural design – the lightness of touch in his work is elegance epitomised. His perfect command of sensuality and refinement has made him one of the most renowned French designers to have gained global recognition.

NOA

The German design studio NOA specialises in designing new products, technologies and communication strategies.

NOA’s fruitful collaboration with VitrA has created many ranges including the M-Line, T4 and Shift collections.

PENTAGON DESIGN

Pentagon Design is an award winning design studio based in Finland. The needs of the consumer are always a primary focus when it comes to their approach. This results in the development of product ideas and strategies that engage the user and the architectural space.

MATTEO THUN & PARTNERS

Milan-based Matteo Thun & Partners is a studio of architecture, design and communication that refuses to be categorised in stylistic terms. This is the reason why the studio can approach such a wide variety and scale of work, ranging from hotels to coffee cups, with endless originality and vitality.

NEXUS

The interdisciplinary Nexus Product Design team has been developing product lines and design strategies for leading brands since 1987. Winners of prestigious international awards, Nexus has created ingenious ranges inspired by VitrA’s finely honed mastery of technology and design; which are smart, elegant and subtly distinctive in style.

INDEED

As Europe’s leading company for holistic design and brand innovations, Indeed creates compelling designs and powerful brand experiences. VitrA’s high-tech and sophisticated Pure and T4 brassware collections were developed by Indeed.

A HISTORY OF INGENUITY

VitrA's rich heritage can be traced back to 1909, when renowned Turkish pharmacist Süleyman Ferit Eczacıbaşı began producing bathing and cologne products at his pharmacy in Izmir. Thirty years on, his son Dr Nejat Eczacıbaşı continued the family's flair for innovation by establishing a pharmaceutical laboratory in Istanbul.

This business grew rapidly and in 1952 he opened the first Turkish modern pharmaceutical plant. Within the decade Eczacıbaşı's vision had grown to encompass ceramic sanitaryware and in 1958 he created the first centre for its production in Turkey. VitrA was born.

INNOVATION CENTRE

VitrA's innovation centre is the creative hub for the design and production of new materials, processes and technologies for its bathroom products and tiles. Here, architects and designers are encouraged to free their imaginations and original ideas are showcased in a setting that blends design with culture, art and lifestyle.

This approach results in innovative solutions that transform an ordinary bathroom into an exceptional living space – new ideas that improve comfort and ergonomcy, and ensure sustainability.

EVOLUTION OF THE VITRA BRAND

Süleyman Ferit Bey, Dr. Nejat Eczacıbaşı's father, is given the title of "Eczacıbaşı".

Dr. Nejat Eczacıbaşı establishes a pharmaceutical laboratory in Istanbul. His first product is a vitamin capsule.

Eczacıbaşı opens Turkey's first production plant for ceramic sanitaryware.

The Eczacıbaşı Group's first ceramic factory in Bozüyük begins production (over time this grew to become the Bozüyük mega complex).

The group opens its first brassware plant within its Bozüyük mega complex.

Production of acrylic bathtubs and ceramic tiles at the Tuzla plant begins.

VitrA opens a sales and marketing office in the USA.

The group's first manufacturing plant opens abroad in Ireland, manufacturing ceramic tiles.

VitrA is an international brand, producing 5 million pieces of sanitaryware per year and exporting to 75 countries worldwide.

1909

Süleyman Ferit Bey buys the Sifa Pharmacy in Izmir and begins producing toothpaste, lotions and creams.

1912

1941

1952

Eczacıbaşı inaugurates the first Turkish modern pharmaceutical plant in Istanbul.

1958

1966

The VitrA brand is launched.

1977

1979

1983

The first ceramic sanitaryware exports begin.

1991

1992

VitrA opens its first sales and marketing offices abroad. VitrA Bad (Germany) and VitrA UK Ltd.

1995

1999

2000

VitrA becomes the first sanitaryware producer in Europe to receive a European Foundation for Quality Management (EFQM) award.

TODAY

EFQM
Shares what works.

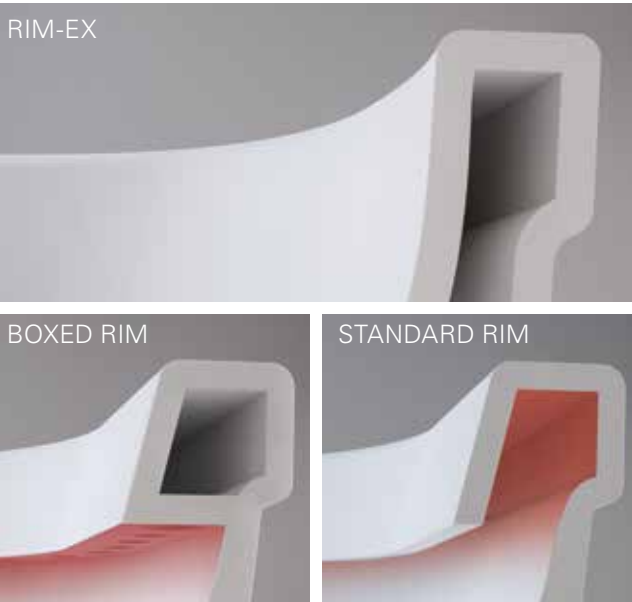

VITRA RIM-EX: EFFORTLESS
CLEANING AND INNOVATIVE,
HYGIENIC DESIGN

Vitra's rimless WC pan eliminates the places where germs gather and multiply, giving you a superior level of hygiene. The unique water distribution engineering at the back of the pan directs the flush around the bowl and can also easily be removed for cleaning.

- Easy cleaning
- No rim or holes for germs to collect
- 95% more hygienic than standard WC pans*

*Tests undertaken by the Akdeniz University, Turkey show Vitra RIM-EX WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

THE RIM-EX RANGE

The wide RIM-EX product range includes a variety of shapes and styles to match any bathroom series.

WC PAN WITH LIQUID
CLEANING TANK PROVIDES
MAXIMUM HYGIENE AND
A FRESH SCENT WITH
EVERY FLUSH

VITRA FRESH

Vitra Fresh WC pans have incorporated a tank into the design of the pan that dispenses detergent with every flush, helping to clean the pan thoroughly and protect from the build-up of bacteria.

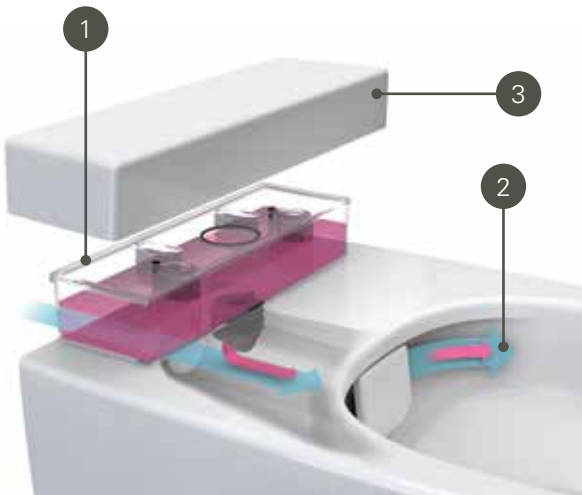

It eliminates the problem of corrosion to the flushing mechanism caused by adding cleaning agents to the cistern. Vitra Fresh is currently only available on the M-Line range.

- 1 The detergent tank sits on top of the WC pan and stores and mixes liquid detergent* with flushing water for maximum hygiene

*The liquid detergent dispenser is safe to use with most commercially available non-abrasive toilet cleaning liquids which include hypochlorous cleaning agents and bleach of up to 12.5 pH.

- 2 Vitra Fresh not only emits the pleasant scent of your detergent but provides superior hygiene and sanitation with every flush

- 3 The removable lid enables easy cleaning and refill

V-CARE: THE NEW
GENERATION
OF SHOWER TOILET
FROM VITRA

The functionality of a toilet and the cleaning properties of a bidet combine to offer an impressive WC design with increased comfort.

Created by designer studio NOA, V-care fits perfectly to all types of bathroom styles and looks completely like a stylish, typical WC. With this new generation of shower toilet, Vitra is offering increased hygiene with water cleaning and ergonomic design. These qualities and increased comfort match the needs of the modern living style such as different washing options, water-seat temperature adjustment, drying options and an automatic open / close mechanism.

V-care will bring a new standard to your bathrooms with its design, comfort and improved hygienic use.

CREATED BY WELL-KNOWN DESIGN STUDIO NOA,
V-CARE SUITS VIRTUALLY ANY BATHROOM ENVIRONMENT
DUE TO ITS ELEGANT AND UNIVERSAL FORM

V-CARE FITS PERFECTLY TO ALL
TYPES OF BATHROOM STYLES

MORE HYGENIC
V-care offers touch-free WC usage and the seat opens via remote or automatically when you approach. You can simply start the integrated shower function with the touch of a button while you stay sitting comfortably on the WC. The washing and drying options are also controlled by the remote.

TOUCH-FREE USE

VERY SIMPLE TO OPERATE
V-care can be used via remote control and has a very simple user-interface. The WC's basic functions can also be controlled on the right and left hand side of the toilet.

THE V-CARE WC
IS VERY EASY
TO CLEAN

EASY TO CLEAN WC
Due to the rimless design of the inner bowl and hidden "V-Fit" installation technology, the V-care WC is very easy to clean.

- Rim-Ex technology eliminates the rim inside the WC, enabling cleaning of the inner bowl with one single wipe.
- "V-Fit" installation technology means that the side of the WC has a completely smooth surface, enabling easy cleaning.

ERGONOMICALLY DESIGNED SEAT
The toilet seat has been designed with the user in mind. It has an optimum seating area and the seat temperature can be adjusted via the remote control.

DRYING AND AIR PURIFICATION
After usage (Comfort version only) the user can select a drying function and also adjust the drying temperature. In both versions, the air purification is automatically activated when the user is seated on the WC.

ALL WASHING
AND DRYING
OPTIONS ARE
CONTROLLED
BY THE
REMOTE

ENERGY-SAVING FUNCTION
There are three modes for usage:

1. Standard
2. Energy-saving
3. Stand-by

SPACE-SAVING
V-care combines the functions of a regular toilet and a bidet, saving the space needed for a bidet in the bathroom.

MORE COMFORTABLE
V-care offers water, seat and drying temperature adjustments. In addition, water pressure can be adjusted to ensure maximum comfort.

INTRODUCING OUR NEW RANGES

SHIFT+

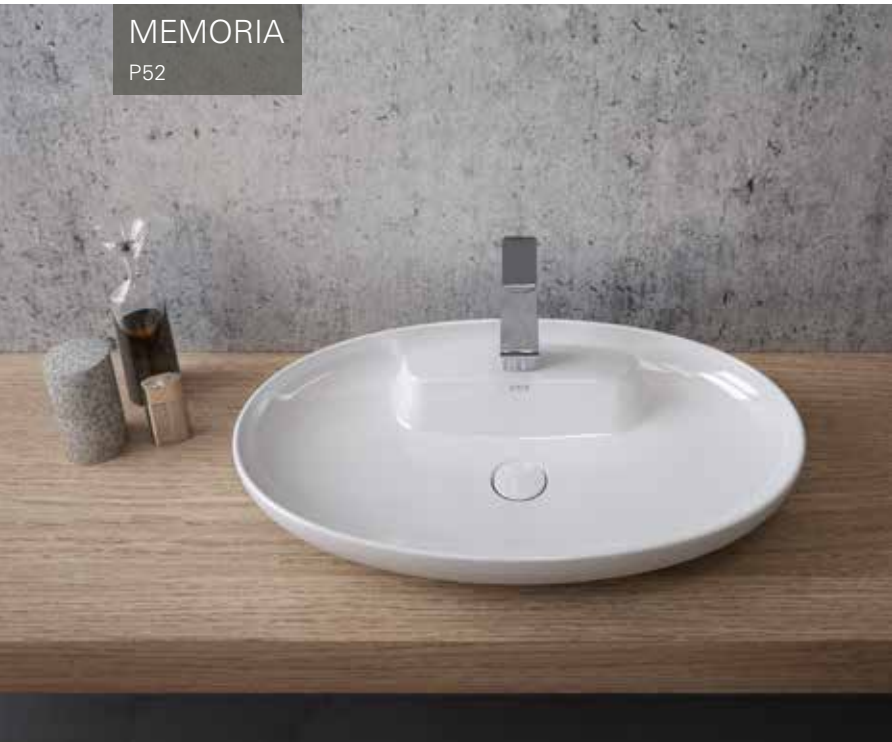

Thin-edged washbasin lines and oval forms combined with angles and arcs make the Shift+ range stand out.

From large to small spaces, this range enables imagination to be applied without constraint. With its modular design and choice of sizes and finishes, the possibilities are almost boundless. Move around, add components, configure and reconfigure. Shift+ is about creating a space that works.

SHIFT+
P78

MEMORIA
P52

MEMORIA

The Vitra Memoria range features fine lines with elegant detail which adapts to any bathroom.

Sophisticated furniture in a range of elegant colours complement the choice of ceramic or Infnit mineralcast and the new matt finish washbasins.

INTRODUCING OUR NEW RANGES

M-LINE INFINIT

Inspired by architectural design, M-Line Infnit combines alternative and man-made materials to bring a harmony to the bathroom.

Designed for those who prefer elegant, artistic styling. Glass frontages add to the minimalistic look and the integrated washbasin has delicate edges that frame the units which offer large storage areas.

M-LINE INFINIT
P84

BRAVA

A contemporary bold design to complement any bathroom range.

Brava is a stunning new range of brassware designed to create a sleek finish to your bathroom choice.

BRAVA
P140

M-LINE

Intelligent and innovative, the M-Line series is the epitome of architectural aspiration and modernistic materials.

Elegant and sophisticated, it creates an exclusive ambience in all sized spaces, setting the architect free and empowering design flexibility with its endless variations.

M-LINE V-CARE

The new generation of shower toilet from Vitra.

It combines the functionality of a toilet and the cleaning properties of a bidet while offering an impressive WC design and increased comfort.

CONCEALED CISTERNS

Hidden behind the wall, Vitra's frame systems are crucial to any modern bathroom, supporting and holding wall-hung WC's firmly in position.

Vitra's frames provide those designing the bathroom complete freedom to create a stunning room without expensive structural building work.

Vitra's concealed cistern panel designs have been developed with individuality in mind.

For this reason, whether it's a mechanical, pneumatic or electronic panel system required, Vitra has a concealed cistern and frame to suit.

5663 Washbasin, 80cm, wall-hung and countertop £212

6397 Ceramic waste cover £50

M-LINE INNOVATION

Developed for superior hygiene, the M-Line series features a wide range of innovative developments that provide users with practical, smart solutions for everyday needs.

The optimal depth of the bowl prevents dirt building up on the surface, enabling residues to easily wash down the waste.

All M-Line washbasins have a specially designed waste area that can be fitted with standard metal waste covers as well as Vitra's special ceramic waste cover.

7672 Wall-hung WC pan, Rim-Ex £317

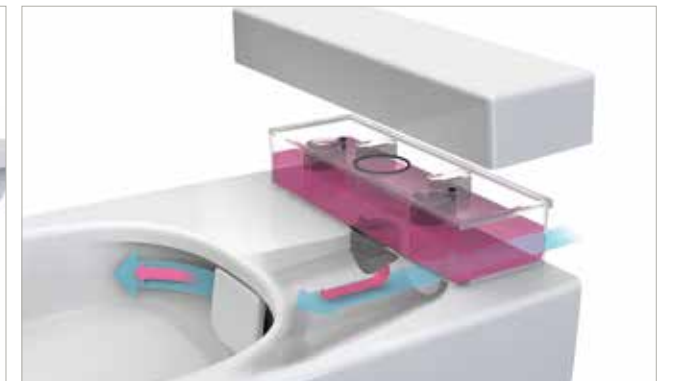

VITRA RIM-EX

The redesigned bowl of the M-Line series WC pan features a channel-free design that eliminates germ reproduction and provides superior hygiene. The water diverter tool can also be easily removed for cleaning.

5676 Wall-hung WC pan, with Vitra Fresh £317

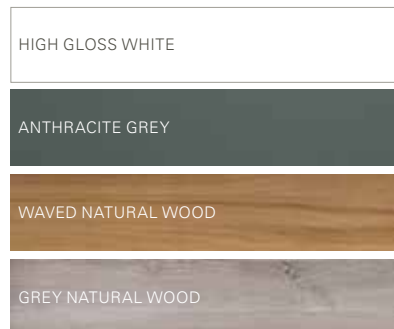

VITRA FRESH

Another M-Line series innovation is the WC pan with a liquid cleaning tank. The tank on top of the WC pan dispenses liquid cleaner with every flush, cleaning the pan thoroughly and protecting against bacteria. It also shields the flushing mechanism from the corrosive effects of cleaning agents placed in the cistern.

An award winning Finnish design studio, Pentagon Design makes the needs of the consumer their primary focus, always intent on engaging the user within the architectural space.

VitrA

BRASSWARE

Vitra mixes graceful curves with elegant angles to create brassware that is both aesthetically and ergonomically pleasing. Carefully engineered design ensures flow and temperature controls require only the lightest of touches. Every consideration is given to conserving water and energy without compromising the user experience.

Designed and manufactured specifically for the UK market and to meet the requirements of varying UK water pressure, Vitra brassware is incredibly easy to install. The main body of each item is of brass construction, and this durability is underpinned by the reassurance of a 5 year guarantee on chrome plating and 1 year guarantee on moving parts.

Add the perfect finish to your bathroom with our brassware, designed to complement any bathroom suite.

VitrA

CONCEALED CISTERNS

CONCEALED CISTERNS

Hidden behind the wall, VitrA's frame systems are crucial to any modern bathroom, supporting and holding wall-hung WCs firmly in position. VitrA's frames provide those designing the bathroom complete freedom to create a stunning room without expensive structural building work.

740-0700 Loop T control panel, gloss white £37
 5676 M-Line wall-hung WC pan £265
 90-003-01 M-Line toilet seat £86
 5675 M-Line wall-hung bidet £243

CONCEALED CISTERNS

INSTALL & SPECIFY
WITH CONFIDENCE

PRACTICAL AND ESSENTIAL FEATURES
Cisterns, pipes, U-bends and other unsightly components become invisible with the use of a concealed cistern and frame. The benefits are not just in terms of appearance: here are some practical reasons for choosing a Vitra wall-hung WC and concealed solution.

HYGIENIC
Keeping a bathroom clean and hygienic is made easier with wall-hung sanitaryware. All unsightly pipe work, a haven for dirt and dust, is hidden behind the wall and the WC is lifted from the floor, providing a smoother and easier cleaning area.

SPACE-SAVING
A wall-hung WC solution takes up less room than a conventional WC and the concealed installation offers flexibility in confined spaces. A wall-hung WC will give the illusion of a larger bathroom as a greater floor area can be seen.

ACCESSIBLE MAINTENANCE
The control panel can easily be removed, providing ready access to internal fittings. Control panels have a 5-year guarantee.

SILENT
The special fill valve located inside the concealed cistern is silent filling. The cistern is covered with styrofoam to provide extra sound proofing.

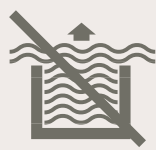

WATER SAVING
The dual flush action for both the 8cm and 12cm concealed cisterns operate at 2.5/4L or 3/6L, resulting in up to 70% reduced water consumption, benefiting both you and the environment.

PRACTICAL & QUICK INSTALLATION
Installation of the concealed frame is quick and easy because of its intuitive design, especially advantageous for multiple installations.

QUALITY & ASSURANCE

100% RELIABILITY AND PERFORMANCE
Vitra's concealed cisterns and frames are subjected to rigorous reliability and performance testing at Vitra's production facilities.

OVERFLOW TESTING
The overflow pipe located within the valve is the product's safety device. The pipe's performance is tested according to the standards of water flow.

FLOW RATE TESTING
The amount of water used during flushing is pre-determined to meet industry standards. If the cistern is not flushed at the required flow rate, the WC pan may not be cleaned properly. As a result, the products must pass a quality control test according to the flow rate (2L/second) set by international standards.

PERFORMANCE TEST
All products are subjected to rigorous performance testing at Vitra's production facilities. Products are tested to ensure that they operate flawlessly before they can be passed.

STRENGTH AND STABILITY
Concealed frames and wall-hung WC pans have been designed to support weights of up to 400kg.

LEAK DETECTION TESTING
We test each and every cistern individually to ensure that it is 100% watertight.

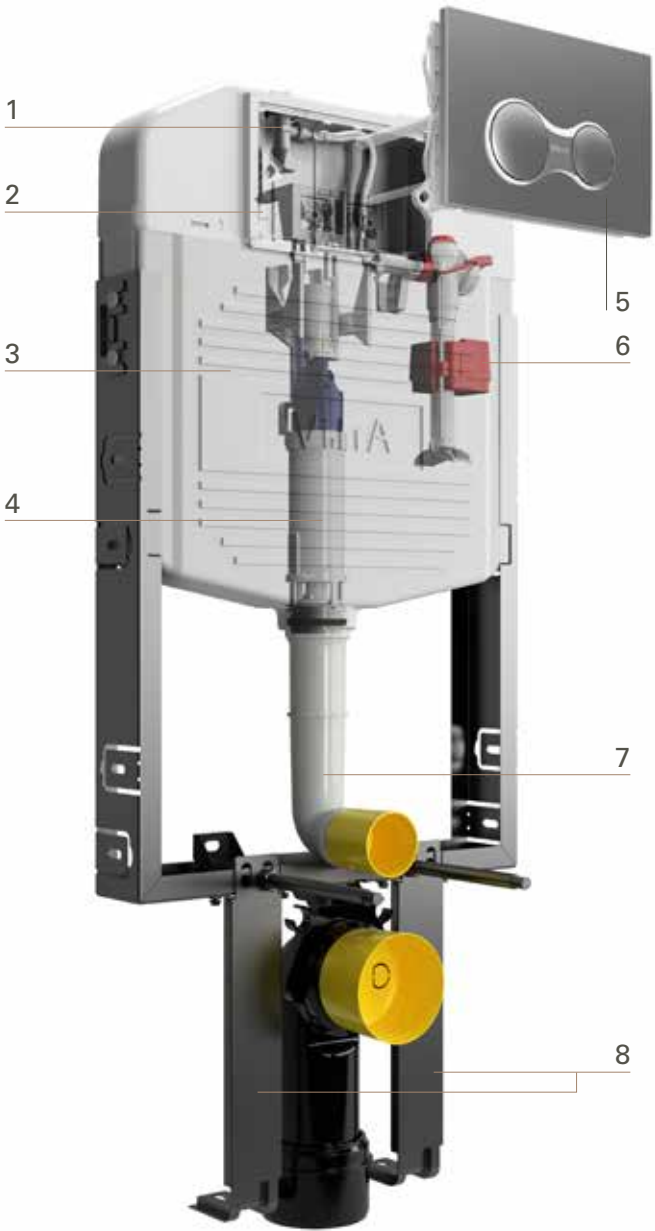

LONGEVITY TEST
Our products are periodically tested for longevity according to international standards. Not one of the product's components demonstrated a drop in performance after being consecutively tested 200,000 times.

1 INTERVAL TAP
An interval tap is supplied pre-installed to the cistern. If maintenance is required, isolating the water flow is easily accessed, allowing repairs to be carried out.

2 PANEL OPENING
The panel opening on the body of the cistern provides easy access to the components and has been designed with an optimum opening size to ensure that maintenance of the product can easily be carried out.

3 STYROFOAM COATING
The bottom section of the cistern is completely coated with styrofoam which prevents condensation and also provides improved sound insulation.

4 FLUSHING UNITS
The most important component of the cistern is the flushing unit responsible for ensuring the flow of water from the cistern into the WC pan. This component meets very stringent standards, to ensure that it does not leak.

5 CONTROL PANEL
The control panel is the component that operates the cistern. The panel can easily be removed for maintenance purposes.

6 FILL VALVE
One of the most important components, the fill valve, controls the water being fed into the cistern. To ensure safety and guaranteed performance, these units are subjected to longevity testing. The units are also equipped with filters that eliminate the risk of clogging to ensure durability and long term use.

7 OVERFLOW PIPE
The overflow pipe located within the flushing component maintains the safety of the concealed cistern. If the cistern fills with excessive water, the pipe ensures that the surplus water is diverted into the WC pan to avoid overflowing.

8 METAL LEGS
Metal legs ensure that the height and calibration of the product from the floor can be completed accurately at the time of installation.

CONCEALED CISTERN PANELS
VitrA's concealed cistern panel designs have been developed with individuality in mind.

For this reason, whether it's a mechanical, pneumatic or electronic panel system required VitrA has a concealed cistern and frame to suit.
